

Anshul Kumar

AI Engineer | Backend Development | Data Science

rahulgagan26@gmail.com | linkedin.com/in/anshul-k-265b581b6 | +91 79828 19241 | github.com/anshul-17

TECHNICAL PROFILE

Computer Science Engineering graduate with expertise in **Backend Development** and **Natural Language Processing (NLP)**. Demonstrated success in building production-ready AI solutions, including a **95%-accurate AI Transcriptor** using **Flask** and **Hugging Face**, and an **AutoEDA tool** that reduced data preprocessing time by 60%. Proficient in **Python, Java, and SQL**, with hands-on experience deploying **RESTful APIs** and scalable **Machine Learning pipelines** gained through internships at **Eoxs** and **Tech Explica**.

SKILLS

- **Core Engineering** : Python, Core Java, SQL, Data Structures & Algorithms (DSA), OOP, SDLC, Git.
- **AI & Machine Learning** : Scikit-learn, Hugging Face, NLP, Model Evaluation, ML Pipelines.
- **Data Engineering & Analytics**: EDA, Pandas, NumPy, Matplotlib, Power BI, Predictive Modeling.
- **Development & Tools**: Flask, Streamlit, REST APIs, VS Code, Jupyter Notebook.

PROJECTS

AI Transcriptor (Flask, NLP, Python)

github.com/anshul-17/transcriptor

- Developed a RESTful API with Flask and Hugging Face to achieve 95% transcription accuracy.
- Optimized data pipelines for real-time audio-to-text processing and model inference.

AutoEDA (Python, Pandas, Numpy)

github.com/anshul-17/EDA-Automation

- Built an automated EDA framework using Pandas and NumPy that reduced preprocessing time by 60%.
- Designed modular scripts for automated feature engineering and data validation across diverse datasets.

Movie Recommendation System (Python, Scikit-learn, Streamlit)

github.com/anshul-17/movie-recommend-system

- Implemented a content-based engine using Cosine Similarity and Scikit-learn on TMDB datasets.
- Deployed an interactive interface using Streamlit to visualize personalized recommendations.

Power BI Data Visualization

github.com/anshul-17/PowerBI

- Designed dashboards for actionable insights.

WORK EXPERIENCE

AI Intern - Eoxs (Remote)

2025

- Built an end-to-end transcription system using Python and NLP for production-ready text analysis.
- Enhanced model performance through rigorous data cleaning and automated preprocessing workflows.

Machine Learning Intern (Python & ML) - Tech Explica

2019

- Developed and tuned Scikit-learn models, improving accuracy through advanced parameter optimization.
- Executed feature engineering and model validation on structured datasets during industrial training.

EDUCATION

B.Tech – Computer Science & Engineering

2021 – 2024

Krishna Engineering College, Ghaziabad

Result declared: 2025 (AKTU)

Diploma (Polytechnic) – ITES&M

2016 – 2019

Aditya Institute of Technology, Delhi
