TECHNICAL PROFILE

Computer Science Engineering graduate with hands-on experience designing and deploying production-ready **AI pipelines, backend architectures, and Natural Language Processing (NLP) solutions**. Demonstrated success in building scalable **RAG systems**, deploying high-accuracy transcription engines using **Flask and Hugging Face**, and engineering automation frameworks that reduce data preprocessing times by 60%. Highly proficient in full-lifecycle Python development, **RESTful APIs**, and relational databases.

SKILLS

- **Core Engineering** : Python, Core Java, SQL, Data Structures & Algorithms (DSA), OOP, SDLC, Git.
- **Generative AI & NLP** : Large Language Models (LLMs), LangChain, ChromaDB, Vector Embedding.
- **Machine Learning & Data Science**: Scikit-learn, Model Evaluation, Predictive Modeling, Exploratory Data Analysis (EDA), Pandas, NumPy.
- **Webframeworks & Tools**: Flask, Streamlit Cloud, RESTful APIs, Git/GitHub, Power BI, VS Code.

PROJECTS

AI Portfolio Assistant (RAG) [Live App] — github.com/anshul-17/PortfolioBot

- Built an end-to-end RAG pipeline using LangChain and ChromaDB to chunk, embed, and index unstructured PDF data.
- Integrated Gemini API to process natural language queries regarding skills and project experience with high context accuracy.
- Deployed a live interactive UI via Streamlit Cloud using secure environment secret management for API access keys.

AI Transcriber (Flask, NLP, Python) github.com/anshul-17/transcriber

- Developed a RESTful API with Flask and Hugging Face to achieve 95% transcription accuracy.
- Optimized data pipelines for real-time audio-to-text processing and model inference.

AutoEDA (Python, Pandas, Numpy) github.com/anshul-17/EDA-Automation

- Built an automated EDA framework using Pandas and NumPy that reduced preprocessing time by 60%.
- Designed modular scripts for automated feature engineering and data validation across diverse datasets.

Movie Recommendation System (Python, Scikit-learn, Streamlit) github.com/anshul-17/movie-recommend-system

- Implemented a content-based engine using Cosine Similarity and Scikit-learn on TMDB datasets.
- Deployed an interactive interface using Streamlit to visualize personalized recommendations.

WORK EXPERIENCE

AI Intern - Eoxs (Remote) 2025

- Built an end-to-end transcription system using Python and NLP for production-ready text analysis.
- Enhanced model performance through rigorous data cleaning and automated preprocessing workflows.

Machine Learning Intern (Python & ML) - Tech Explica 2019

- Developed and tuned Scikit-learn models, improving accuracy through advanced parameter optimization.
- Executed feature engineering and model validation on structured datasets during industrial training.

EDUCATION

B.Tech – Computer Science & Engineering	2021 – 2024
Krishna Engineering College, Ghaziabad	<i>Result declared: 2025 (AKTU)</i>
Diploma (Polytechnic) – ITES&M	2016 – 2019
Aditya Institute of Technology, Delhi	

CERTIFICATIONS

- Data Visualization: Empowering Business with Effective Insights — TCS ([Link](#))
- Python 101 for Data Science — Cognitive Class ([Link](#))
- Data Science & Analytics — HP LIFE ([Link](#))
- Python Programming Fundamentals — Microsoft (Coursera) ([Link](#))
- Supervised Machine Learning: Classification & Regression — IBM (Coursera) ([Link](#))
